01	全科诊疗椅 General practice diagnosis and treatment chair	09-15
02	候诊区（一次、二次、三次候诊） Waiting area (primary, secondary, tertiary)	16-43
03	诊室、检查室 Consulting room, examination room	44-53
04	输液区 Infusion area	54-61
05	病房（VIP、单间、多人间、特殊病房） Ward (VIP, single room, multi room, special ward)	62-79
06	妇科 Gynaecology	80-87
07	儿科 Pediatrics	88-95
08	实验、化验室 Experiment, laboratory	96-97
09	行政办公区 Administrative Office area	98-101
10	工程案例 Engineering Cases	102-103

针对医院的特殊环境， 我们的所有材料都进行了升级。

IN RESPONSE TO THE SPECIAL ENVIRONMENT OF THE HOSPITAL,
ALL OF OUR MATERIALS HAVE BEEN UPGRADED.

面料 / Fabric

★ 具有卓越的耐腐蚀、耐紫外线消毒及抗老化性能 **Excellent corrosion resistance, UV disinfection resistance and anti-aging performance**

满足医院院感要求的耐医用清洗剂、消毒剂的腐蚀（戊二醛、苯酚浓溶液、漂白液、季铵氯化物 + 甲醇、异丙醇、双氧水、安得福等），QUV 大于 650 小时，具有卓越的耐紫外线消毒及抗老化性能。

The corrosion resistance of medical cleaning agents and disinfectants (glutaraldehyde, phenol concentrate, bleach, quaternary ammonium chloride+methanol, isopropanol, hydrogen peroxide, ANDEFU, etc.) that meet the hospital's hospital sense requirements is more than 650 hours, and has excellent ultraviolet disinfection resistance and anti-aging performance.

★ 高耐磨耐用性 **High wear resistance and durability**

面料耐用年限大于 3 年，耐磨耗性能马丁代尔达到 10 万次以上，非常适合医院等公共场合的高频次使用密度。

The fabric has a durability period of more than 3 years, and the wear resistance of Martindale reaches over 100000 times, making it very suitable for high-frequency usage density in public places such as hospitals.

★ 防霉抗菌抗有害微生物抗病毒性能 **Anti mold, antibacterial, anti harmful microorganisms, and antiviral properties**

符合 ASTM D4576 和 ASTM G21-13 的 0 级标准，对于冠状病毒冠状病毒的存在减少 90%以上，对冠状病毒的活性降低 99.9% 对于金黄色葡萄球菌（MRSA），大肠杆菌和肺炎克雷伯菌具有 99%灭杀作用。

Conforming to ASTM D4576 and ASTM G21-13 level 0 standards, it reduces the presence of coronavirus by more than 90%, and its activity against coronavirus by 99.9%. It has a 99% killing effect on Staphylococcus aureus (MRSA), Escherichia coli, and Klebsiella pneumoniae.

★ 具备 100% 防水防渗透能力 **Equipped with 100% waterproof and impermeable ability**

实验静水压测试达 500mm 以上。

The experimental hydrostatic pressure test reaches over 500mm.

★ 出色的抗污易清洁能力 **Excellent anti fouling and easy cleaning ability**

对于医院环境中的污染物具有优秀的易清洁性能，符合 AATCC 130-2010 标准。

It has excellent easy cleaning performance for pollutants in the hospital environment and meets the AATCC 130-2010 standard.

海绵 / Sponge

★ 采用 40° 以上高密度、高回弹原生切割棉，软硬适中，回弹性好，久坐不变形。

Made of high-density, high rebound native cutting cotton with a temperature of over 40°, with moderate softness and hardness, good resilience, and no deformation after prolonged sitting.

木材 / Wood

★ 内框架：采用优质刨方，无树皮、无结疤，干湿度控制在 13° 以下，不易发霉生虫，结实耐用。

Inner frame: Made of high-quality planing, without bark or scabs, with dry and humidity controlled below 13°C, resistant to mold, sturdy and durable.

★ 外框架：采用进口白蜡木，木纹清晰，结疤少。五底三面油漆工艺处理，表面光滑无气泡。

Outer frame: Imported white wax wood with clear grain,. Five bottoms and three sides paint processing, with a smooth surface without bubbles.

五金 / Hardware

★ 优质冷轧钢管、板，表面静电粉末喷涂，附着性好，耐腐蚀、耐磨度高。

High quality cold rolled steel pipes and plates, with electrostatic powder spraying on the surface, good adhesion, corrosion resistance, and high wear resistance.

★ 304 不锈钢，表面抛光拉丝处理，耐磨、耐腐蚀。

304 stainless steel, surface polished and brushed, wear-resistant and corrosion-resistant.

我们将在保护生态、维护人类健康、创造优品之间寻找最佳的平衡点，持续为客户提供符合时代和自身需求的产品，从能源、新型材料、智能、回收利用、社会责任等多个维度进行不断探索，创造可持续的良性循环发展模式。

We will find the best balance between protecting ecology, maintaining human health, and creating high-quality products, continuously providing customers with products that meet the needs of the times and ourselves. We will continuously explore from multiple dimensions such as energy, new materials, intelligence, recycling, and social responsibility, and create a sustainable and virtuous cycle development model.

以科技为本，为人类健康而奋斗！

Based on technology, strive for human health!

全科诊疗椅

GENERAL PRACTICE MEDICAL CHAIR

格力特（Glitter）101 手动版

外观专利：2023300232494

实用新型专利：2023201010787

针对特需患者设计：

- 1、中控刹车机构，一键控制四轮锁止，转运患者时操作轻松简便。
- 2、靠背可躺 160°，脚踏可伸出放平，可满足医生诊疗需求。
- 3、通过控制扶手底部两侧机构可使整个椅身成负角度（脚部高于头部）形态，便于医生处置患者腿部伤口。
- 4、左侧扶手可放倒，方便医护人员协助患者上下座椅。
- 5、座椅前方下端有可伸缩踏板，在转运病人时可拉出放脚；可满足患者诊疗、一般伤口处置、活动、输液、转运及家属陪护等多种需求，适用于特需病房等。

操作流程：

踩下此处红色按钮（踩绿色松开刹车）即可刹住 4 个轮子，以固定椅身

向后转动右侧手柄打开脚踏（向前则收回脚踏）

掰动此机构将靠背放倒至 170°（再次掰动则复原靠背）

①

②

③

踩下此踏板椅身处于负角度形态（再次踩动则复原）

向后拉出此开关打开左侧扶手便于医护人员协助患者上下座椅

此把手用于推动座椅，操作轻松简便

在椅身回位时可拉出此踏板便与患者放脚

高效有序的诊疗服务

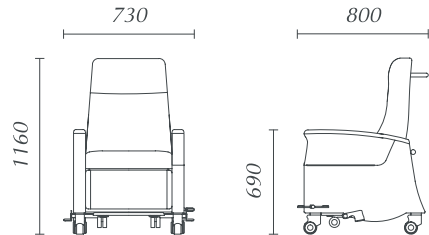

为了提高医护的诊疗效果和患者的服务体验，以人为本的设计理念，将多种特色、多样化的医疗家具融入环境之中，采用灵活多变的医疗家具建立一个环境整洁、布局合理、作业高效的服务体系，提高医患满意度，增强医护效率。

EFFICIENT AND ORDERLY CARING SERVICE

In order to improve the diagnosis and treatment effectiveness of medical care and the service experience of patients, the people-oriented design concept integrates various unique and diverse medical furniture into the environment, and adopts flexible and variable medical furniture to establish a clean, reasonably arranged, and efficient service system, improving doctor-patient satisfaction and enhancing medical efficiency.

LJ-FY0088

候诊区（一次、二次、三次候诊）

WAITING AREA (PRIMARY, SECONDARY, TERTIARY)

候诊区为病人入院求诊时提供等候和休息服务，一般设置在大厅处或收费、挂号附近。作为患者入院候诊时的第一接触，不仅为患者提供等候和休息，还是医院的“门面担当”，是医院综合实力的象征。

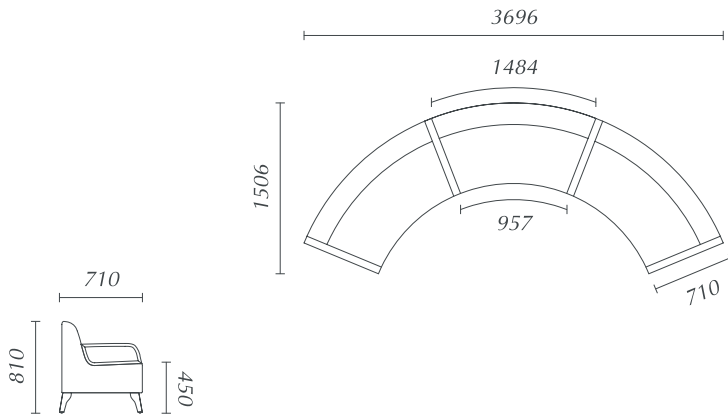

The waiting area provides waiting and rest services for patients upon admission, and is generally located in the lobby or near charging or registration areas. As the first contact for patients upon admission and waiting, it not only provides them with waiting and rest, but also serves as a "facade responsibility" for the hospital and a symbol of its comprehensive strength.

医院人流量大，家具使用频繁，除了对家具的耐用程度有了较高的要求外，设计分区也要合理。“去繁从简”的理念打造产品造型，整体可自由组合设计，使用者感到和谐舒适，得到较好的放松和休息、更快地康复。

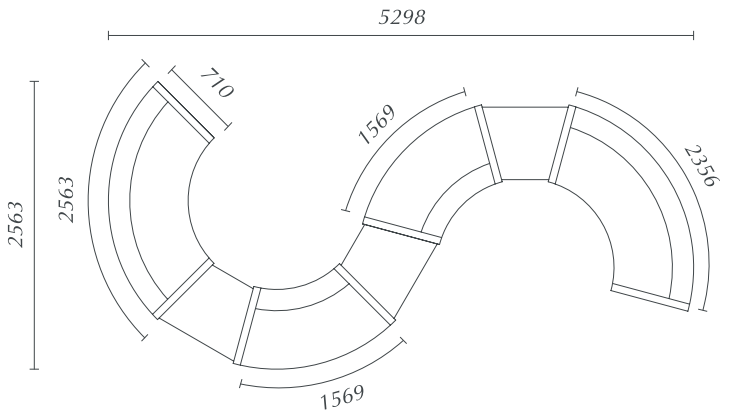

Hospitals have a large pedestrian flow and frequent use of furniture. In addition to high requirements for the durability of furniture, the design of partitions should also be reasonable. The concept of "reducing complexity and simplifying" creates a product design that can be freely combined, making users feel harmonious and comfortable, receiving better relaxation and rest, and faster recovery.

和谐的医患互动
Harmonious doctor-patient interaction

检查、诊室 CONSULTING ROOM, EXAMINATION ROOM

检查、诊室是医院和患者直接交流、初步检查及诊断，并完成诊察记录的场所，患者希望能够得到明确的诊断结果和满意的治疗方案，应营造亲切宜人并相对私密的诊疗环境。诊室相对于候诊区属于小空间、安静区。诊桌、患者椅、医生座椅、洗手柜台、治疗床等家具配置与设计应优先考虑医生以最短路径完成诊、查，使医生的工作更高效。

Examination and consultation rooms are places where hospitals and patients directly communicate, conduct preliminary examinations and diagnoses, and complete diagnosis records. Patients hope to receive clear diagnostic results and satisfactory treatment plans, and should create a friendly, pleasant, and relatively private diagnosis and treatment environment. The consultation room belongs to a small and quiet area relative to the waiting area. The configuration and design of furniture such as diagnosis tables, patient chairs, doctor seats, hand washing counters, and treatment beds should prioritize doctors completing diagnosis and examination through the shortest path to make their work more efficient.

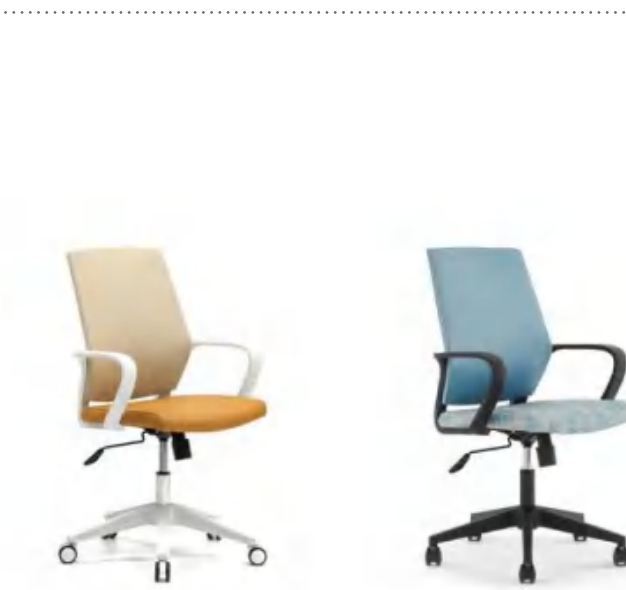

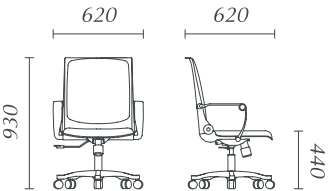

医生椅采用圆弧形扶手设计，可避免扶手挂医生白大褂的情况，且更结实耐用。另坐垫和靠背均采用专业级医疗用皮革，抑菌、易清洁。
The doctor's chair adopts an arc shaped armrest design, which can avoid hanging the doctor's white coat on the armrest and is more durable and sturdy. In addition, the seat cushion and backrest are made of professional medical leather, which is antibacterial and easy to clean.

座椅整体按照人体工学原理设计，提供良好的腰背支撑，缓解长时间工作带来的疲劳。坐垫和靠背的设计符合人体曲线，提供舒适的坐感，提高医护人员的工作效率和舒适度。座椅和靠背均使用专业医用皮革，具有出色的耐磨性和抗菌性能。椅子的设计风格简约现代，外观大方得体，能够与医院的整体环境相融合。其优雅的外观不仅提升了医院的整体形象，还为医生的工作空间增添了一份专业与舒适。

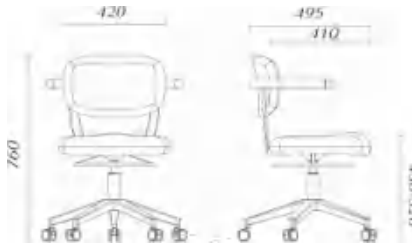

The whole seat is designed according to the ergonomic principle, providing good support for the waist and back, and alleviating the fatigue brought by long hours of work. The cushion and backrest are designed to conform to the curve of the human body, providing a comfortable feeling of sitting and improving the work efficiency and comfort of medical staff. The seat and backrest are made of professional medical leather with excellent wear resistance and antibacterial properties. The design style of the chair is simple and modern, and the appearance is elegant and decent, which can be integrated with the overall environment of the hospital. Its elegant appearance not only enhances the overall image of the hospital, but also adds a professionalism and comfort to the doctor's workspace.

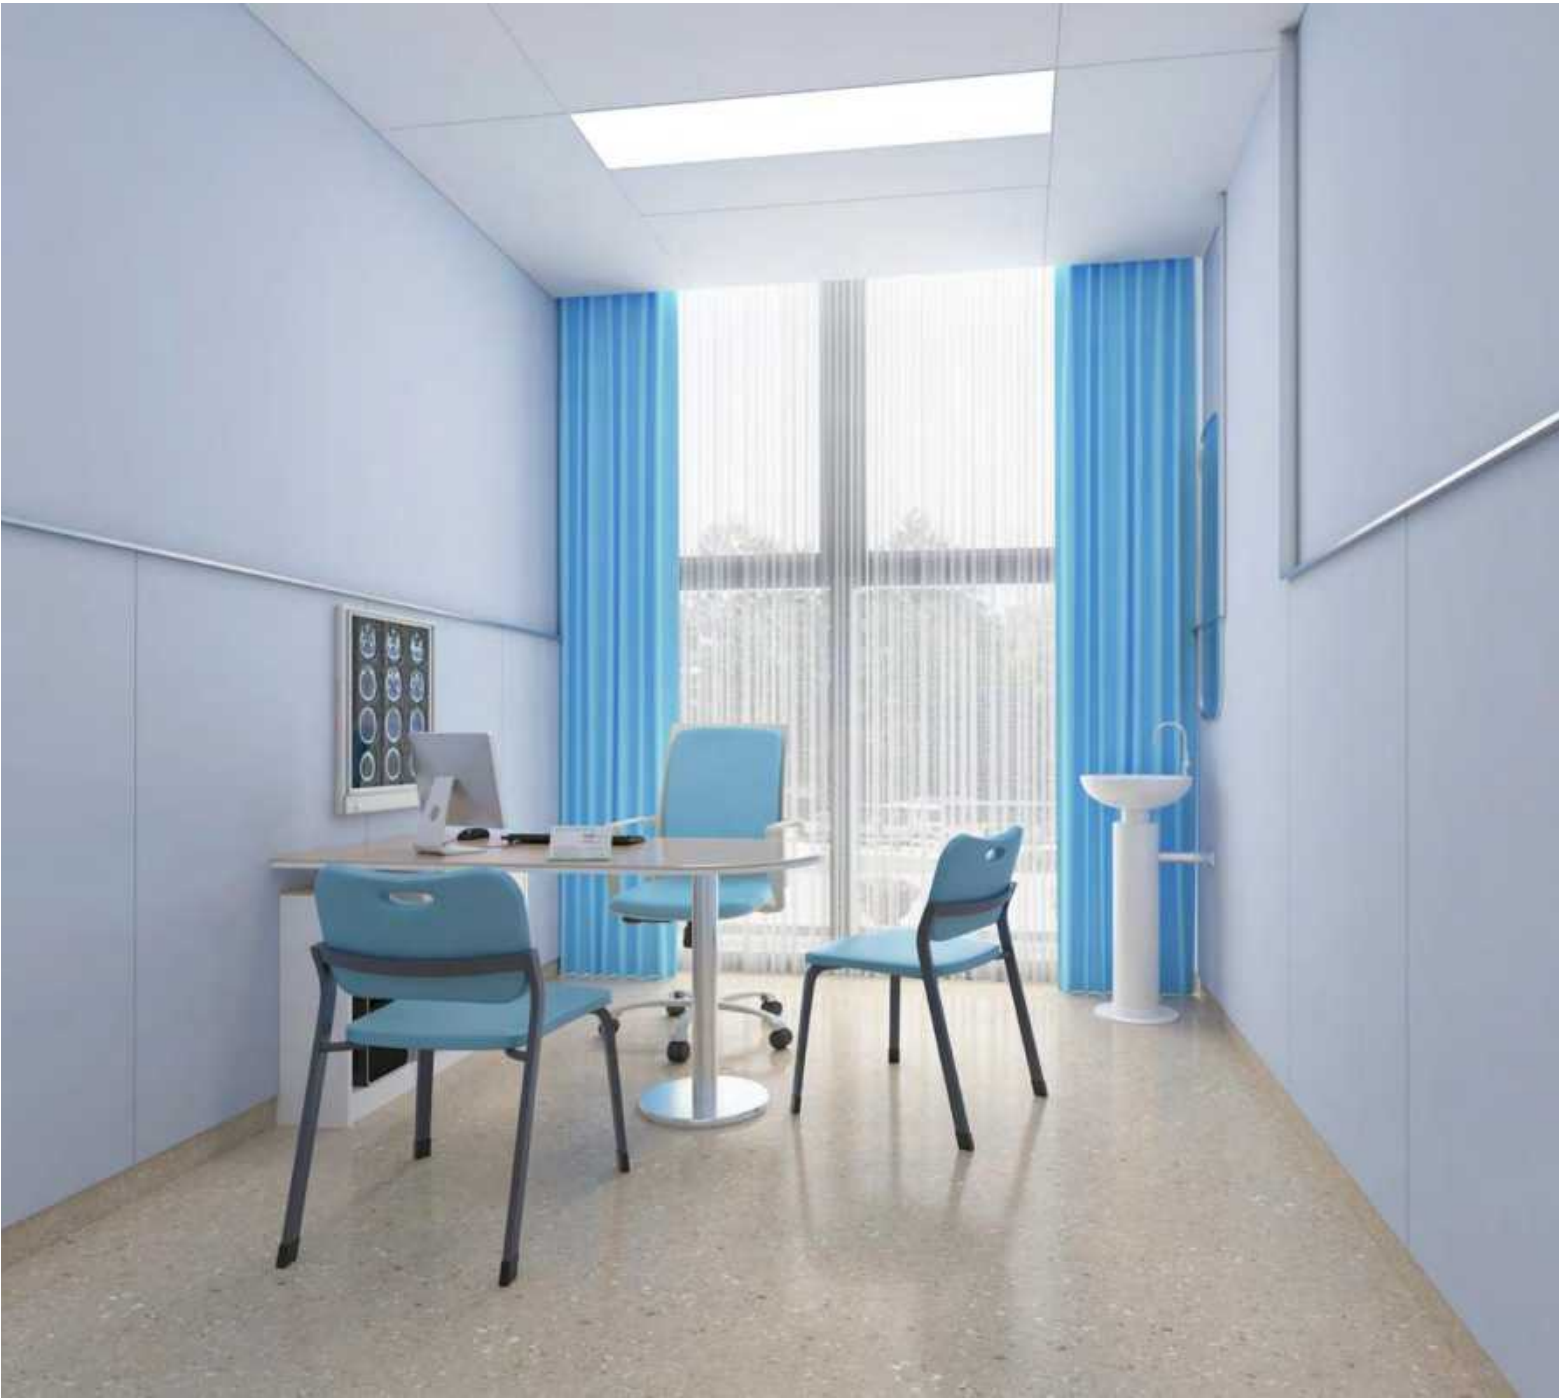

LJ-AY0101

LJ-RY0098

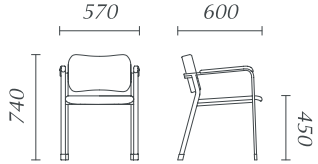

蓝色是强生命力的象征，符合医院主题，寓意帮助病人早日摆脱疾病痛苦、恢复健康，以满血复活的状态投入到新的生活、工作、学习中去。蓝色也能强化整体空间视觉感，营造自然平静的就医环境。

Blue is a symbol of strong vitality, in line with the theme of the hospital, symbolizing helping patients get rid of disease pain and recover their health as soon as possible, and immersing themselves in a new life, work, and study with a state of full blood resurrection. Blue can also enhance the overall visual sense of the space and create a natural and peaceful medical environment.

陪护沙发 Accompanying sofa

专利号：202130211076.X

此区域较 VIP 套间空间相对较小，但相比多人病房空间又较为富裕，对家属陪护与接待有一定的要求，因此采用单人陪护沙发或单人陪护沙发 + 接待椅的组合配置较为合适。

This area has relatively small space compared to VIP suites, but it is also more spacious compared to a multi person ward, which has certain requirements for family care and reception. Therefore, it is more suitable to use a single person accompanying sofa or a combination of single person accompanying sofa and reception chair.

哺乳椅 Breastfeeding chair

哺乳椅按照人体工学原理设计，具有符合人体曲线的靠背和坐垫，提供良好的背部和腰部支撑。高靠背设计可以支撑母亲的头部和颈部，缓解长时间哺乳带来的疲劳。配有轻柔的摇动功能，帮助安抚婴儿入睡。这一功能不仅有助于增强母婴之间的情感联系，还能帮助母亲在哺乳时更放松。宽大且柔软的扶手为母亲提供了一个舒适的手臂支撑，减少了长时间抱婴儿带来的手臂疲劳。其现代感和功能性使其不仅适合家庭使用，也适合医院、母婴室等公共场所。

The nursing chair is designed in accordance with ergonomic principles and has a backrest and cushion that conform to the human body curve to provide good back and waist support. The high back design can support the mother's head and neck, relieving fatigue caused by prolonged breastfeeding. It is equipped with a gentle rocking function to help soothe the baby to sleep. This function not only helps to strengthen the emotional connection between mother and baby, but also helps the mother to be more relaxed while breastfeeding. The wide and soft armrests provide a comfortable arm support for the mother and reduce arm fatigue caused by holding the baby for a long time. Its modern feel and functionality make it not only suitable for family use, but also suitable for public places such as hospitals and mother and baby rooms.

COMFORTABLE AND PRIVATE

妇科
GYNAECOLOGY

此区域家具主要使用对象为(准)宝妈，结合其不同孕周期身体与生理特征变化设计出候诊、胎监、产后康复不同应用场景的产品，为伟大的宝妈们赋能！

The main use of furniture in this area is for (prospective) Baoma. Based on the changes in their physical and physiological characteristics during different pregnancy cycles, products are designed for different application scenarios such as waiting for treatment, fetal monitoring, and postpartum rehabilitation, empowering the great Baoma!

专门根据宝妈们产后实际需求，脚架采用弧形可逍遥设计，方便哺乳和哄睡婴儿，靠背设计更加符合产后女性人体工程学需求，最大程度保证舒适度。

Specially designed according to the actual needs of postpartum mothers, the foot rest adopts a curved and carefree design, which is convenient for breastfeeding and sleeping babies. The backrest design is more in line with the ergonomic needs of postpartum women, ensuring maximum comfort.

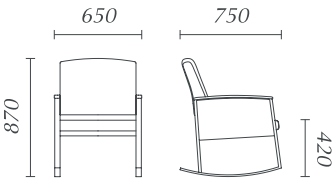

另增加脚踏设计大大提升用户舒适度！适用于产后病房以及月子中心。

Additionally, the addition of foot pedal design greatly enhances user comfort! Suitable for postpartum wards and postpartum centers.

妇科等候椅 Gynecological waiting chair

座椅和靠背采用高密度泡沫填充，外覆优质的皮革，确保了良好的舒适度和支撑力。软包材质的选择能够有效缓解长时间等候带来的疲劳感，为女性患者提供更为贴心的呵护。座椅的颜色选择温馨柔和的色调，旨在为女性患者营造一个舒缓和放松的环境。色彩的搭配不仅提升了等候区的整体美感，还能在一定程度上缓解患者的紧张情绪。

The seat and backrest are filled with high-density foam and covered with high-quality leather, ensuring good comfort and support. The choice of soft bag material can effectively alleviate the fatigue caused by long waiting time, and provide more intimate care for female patients. The color of the chair is chosen in warm and soft tones, aiming to create a soothing and relaxing environment for female patients. The collocation of colors not only enhances the overall beauty of the waiting area, but also relieves the tension of patients to a certain extent.

单人等候椅 Single waiting chair

座椅采用高密度泡沫填充的圆润软包设计，能够有效减轻患者在等待过程中长时间坐立的疲劳感。按照人体工学原理设计，贴合人体曲线，提供良好的腰背支撑，确保患者在等待过程中保持舒适的坐姿，有效减轻久坐带来的不适感。增强患者的隐私保护，椅子设计了两侧带有隐蔽性的挡板。减少了患者之间的相互干扰，也增加了患者的安全感和舒适感，与椅子的整体设计完美融合。款椅子还可以作为会议椅使用。其设计注重舒适性和稳固，适合长时间的会议使用。

The chair is designed with a round soft bag filled with high-density foam, which can effectively reduce the fatigue of patients sitting and standing for a long time during the waiting process. Designed according to the ergonomic principle, it fits the human curve, provides good lumbar and back support, ensures that patients maintain a comfortable sitting position during the waiting process, and effectively reduces the discomfort caused by sitting for a long time. To enhance patient privacy, the chair is designed with concealed baffles on both sides. It reduces the mutual interference between patients, also increases the sense of security and comfort of patients, and perfectly integrates with the overall design of the chair. This chair can also be used as meeting chair. Designed for comfort and stability, it is suitable for long meetings.

儿科

PEDIATRICS

儿科诊室设计应针对儿童心理特点，既新意又安全。引入国际儿童医院去医院化理念，体现活泼、健康、如家温暖的儿童文化视觉。沉静的马卡龙蓝搭配阳光触感的细腻黄色打造温馨舒适的空间氛围；卡通元素的造型，增加彩绘空间，使空间在视觉上得以充实，环境变得活跃，从而增加孩子的信任感，减少恐惧感。

The design of pediatric consultation rooms should be tailored to the psychological characteristics of children, both innovative and safe. Introducing the concept of international children's hospital de hospital, reflecting a lively, healthy, and warm children's cultural vision. The serene Makaron blue paired with the delicate yellow touch of sunlight creates a warm and comfortable spatial atmosphere; The design of cartoon elements adds color drawing space, making the space visually enriched and the environment more active, thereby increasing children's trust and reducing fear.

儿科候诊空间

Pediatric waiting space

设计坚持以人为本的理念，根据人机工程学设计符合儿童身高的尺寸。通过色彩、造型等一系列装饰手段在保持完善的医疗功能的同时设计出活泼欢快、符合儿童心理的病房。

The design adheres to the concept of putting people first and designs dimensions that meet the height of children based on ergonomics. By using a series of decorative methods such as color and shape, while maintaining complete medical functions, a lively and cheerful ward that conforms to children's psychology is designed.

儿科活动区 Pediatric activity area

无障碍设计保障儿童安全性，丰富的造型及色彩搭配营造活泼的候诊空间，缓解儿童的不适情绪。

不同尺寸及造型同时满足儿童及陪同家长的候诊需求。

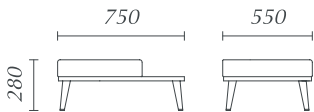

Accessible design ensures children’s safety, and rich styling and color combinations create a lively waiting space to alleviate children’s discomfort.
Different sizes and shapes meet the waiting needs of both children and accompanying parents.
